SCAN ALL MY WORK

ABOUT ME

I'm passionate about building websites and developing new products, especially in creating strategic web designs and driving SEO. Create truly good results. With hands-on experience in both Business Development Product and QA Testing, I bring a well-rounded perspective to every project — combining user needs, technical insights, and business goals.

I enjoy testing systems, troubleshooting issues, and continuously improving website performance in terms of speed, stability, and search visibility. Seeing a system I've helped develop grow, Deliver Business Value, scale, and reach a large number of users is what truly motivates me.

WORK EXPERIENCE

QA Tester/ BD

2025 - 2022

JDN COMPANY LIMITED

At JDN, I have played a key role in the development and deployment of Web3 products and blockchain, including HyperNFT, JNFT, JFIN Staking, JNS and various products.

In my QA role, I was responsible for end-to-end system testing, feature validation, and proposing product improvements based on user needs. I also supported solution setup for clients to ensure smooth onboarding and integration of our tools.

On the Business Development, I the adoption of our platforms across real-world industries — particularly within the NFT, creator, and arts ecosystem. I negotiated with partners such as artists, business owners, and associations, and helped launch strategies in PR, marketing, and engagement that drove real results.

QA Tester / Wordpress Dev

2022 - 2021

Shoplive COMPANY LIMITED

Performed end-to-end testing for the company's live-stream shopping platform, ensuring smooth functionality across both user-facing and back-office systems. Collaborated with developers to identify, report, and resolve bugs, ensuring a stable and seamless user experience.

Additionally contributed to website development using WordPress, including building e-commerce and company profile websites, customizing UI/UX, creating and managing content, and maintaining overall site performance and availability.

INTERN Wordpress Dev

2019

DomeCloud

Supported the development of custom WordPress websites for clients, delivering business-focused web solutions such as company profiles, landing pages, and online storefronts. Responsibilities included theme setup, plugin configuration, and UI/UX customization to meet client needs.

Started freelance Wordpress developer

2018

Started working as a freelance WordPress developer in 2018, self-taught and client-driven. Responsibilities included designing websites, developing custom themes and plugins, and implementing advanced functionality tailored to client requirements.

Built a wide range of websites including:

- Company profile sites
- Product and e-commerce pages
- Service-based business websites
